

## Nencki After Sales Service Keeping things rolling

Nencki's After Sales Service continually maintains global support for its customers and thereby ensuring long-term commitment and securing their production.

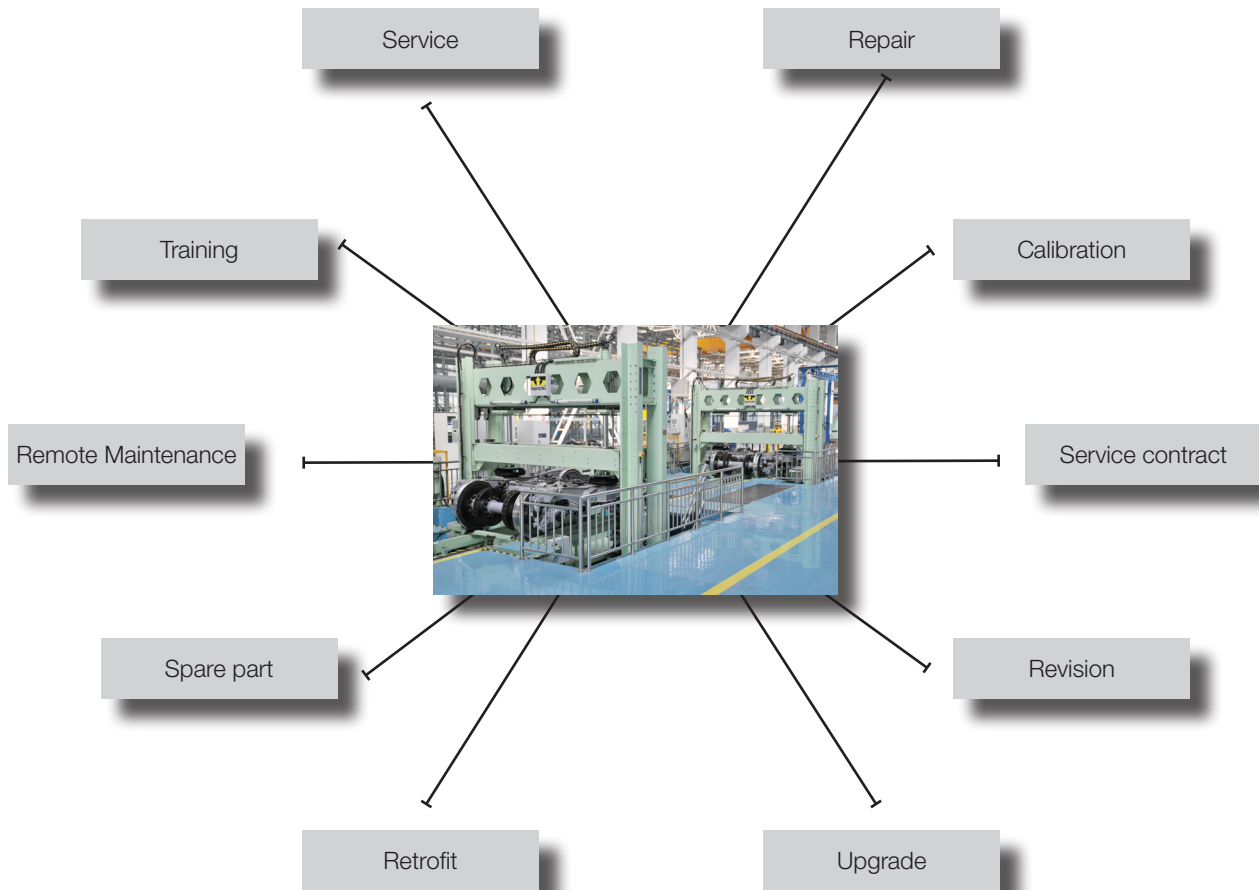

## Trained specialists Short reaction time

Our maintenance and field services guarantee a successful product and system performance. The goal is to reduce the risk of untimely and costly disturbances and downtime. In order to obtain excellent performance we offer preventative maintenance by analyzing specific failures and identifying the root causes. This unique application competence offers significant advantages to our customers. The key to a successful preventative maintenance program is creating a good equipment history so you can improve your program, justify changes and avoid unwanted interruptions.

Hotline +41 62 919 93 69

Nencki has the necessary resources for meeting the customer's long term requirements for spare parts. Later on, migration becomes more and more important and we can assist you in upgrading existing installations.

»A missing spare part can impair plant availability and cause loss of production. Good to know, that Nencki's specialists ensure a fast and smooth exchange of spare parts«

Industrial spare parts are stored for up to ten years, and faulty components can be returned.

The replacement parts arrive at their destination as quickly as possible, thanks to optimized logistics. Furthermore, the outstanding system compatibility ensures the availability of plants in a sustainable manner. The on-time receipt of spare parts is guaranteed by previously arranged delivery times. In connection with the delivery, Nencki's logistics specialists also take care of transportation, customs clearance, storage and order management, spare parts management, and logistics planning and management. The result: smooth and fast delivery of spare parts for a reliable availability of plants.
